Dear Bob

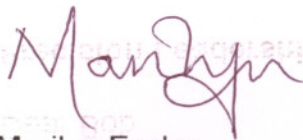

Precision Leadership in a World of Change

I am writing to thank you for such an inspirational and thought provoking day. You gave us the time and the tools to reflect on our work as managers and leaders but also on how we work with children and families. The feedback from all those attending has been positive and in my work with a large group of those attending I will build on your themes and ideas in future development days.

Thank you for the work you do and the professional way in which you do it. I hope to meet up with you again in the future.

Best wishes,

Yours sincerely,

Marilyn Eccles
Director for Urban Education (Manchester)
